SLASH NETS OF RIVALS

Rivalry Between Illinois and Wisconsin Fishermen at Waukegan

HUGE LOSS TO BOOTH & CO.

The Coming of Wisconsin Fishermen to Waukegan After Wisconsin Season Closes Causes Serious Trouble

So bitter has the competition between Illinois fishermen engaged in fishing out of Waukegan and the dozens of fishermen who have come down from Wisconsin waters that the cutting of nets, the outlaw proposition of fishermen, has broken out there.

The first and most disastrous outlaw act has for its victim the Booth Packing Company of Chicago, whose tug, the Harrow, Capt. Wm. Schaffer, has lost 15 boxes of nets, enough to stretch a straight line of about seven or eight miles. The nets are now floating in the lake and while some may be recovered in time by dragging the lake bottom, they are practically given up for lost.

The season in Wisconsin closed Oct. 15th and immediately the fishermen from Kenosha, Racine and Milwaukee as well as points further north, came to Waukegan, thus invading the fishing grounds which the local men for years claim as their personal stamping ground. In all, 12 out of town boats came there and strung their nets in the lake near where the local fishermen have fished for years. In Waukegan there are two steam tugs and five gasoline boats which devote all their time to fishing, hence, when the 12 Wisconsin boats laid their nets the lake was covered in a manner which makes it resemble a cedar swamp. The result is that in many cases, the fishermen have been overlapping each others nets.

This is charged to have been the cause of invading fishermen cutting the hundreds of nets of the Booth company—they claim the Booth men were not careful, that they strung their nets in such a way that they overlapped the others and therefore, under fishermen's moral law, they merely cut them loose. Fishermen who cut nets in this manner make no excuses as, for years, it has been considered an outlaw trick to string nets across another fellow's leads. This is the largest loss ever suffered hereabouts in this manner and the incident has precipitated a strong feeling among the local fishermen and the invaders from Wisconsin. The local fishermen claim that the Booth company has used the particular spot where the others set their nets, that therefore they had a right to place their nets over the Wisconsin men's nets. The latter, however, insist on the moral law being upheld, that the one who gets there first shall have precedence.

Fishing there is now reported very poor. The season closes in Illinois on Nov. 15th, until Dec. 15th. Beginning yesterday (Wednesday) in Wisconsin for 20 days, fishermen may fish for spawn but the Wisconsin men declare they will remain in Illinois waters until the season closes next month.

NEW STATE BANK TO BE OPENED AT ROCKEFELLER

The State Bank of Rockefeller will be opened in that village this week. At a meeting of the stock holders Tuesday the following officers were elected: President, S. L. Tripp; Vice President, R. S. Rouse; Cashier, Irving Payne.

The directors of the new bank will be composed of the officers and the following men from the village, N. H. Miller, J. S. Gudley and Dr. Taylor of Libertyville.

The fixtures of the bank have been placed in the north part of the store occupied by William Nehrlich, where the bank will remain until the officers see fit to erect a building of their own.

Girl's Ride of 5,420 Miles.

A Coesack girl named Kudashoff has started to ride from Kurlin to St. Petersburg, a distance of some 5,420 miles. Her mount is a light gray Mongolian pony, and she is riding astride on an ordinary Coesack saddle. She carries a hunting-knife and a revolver, and her only companion is a pure-bred St. Bernard dog. The plucky horsewoman was formerly a railway employe, and during the Russo-Japanese war was awarded the gold medal "for zeal."

HOLDS SHILOH HOUSE

Elder Taylor of Zion City, Claiming to be Dowie's Successor, Defies Voliva

Sitting in the beautiful residence that Dowie built in Zion City and which is called Shiloh House, Elder W. D. Taylor, who claims he is the real successor to Dowie and head of the Christian Catholic church of Zion, refuses to vacate the beautiful residence despite the fact the Overseer Voliva, who also claims to be Dowie's successor has apparently secured legal claim to the residence.

Taylor has been called into Justice Weiss' court in Waukegan on Saturday next on complaint of Voliva and a trial for eviction will take place.

The residence was stripped of its carpets, chairs, bedding, etc., last week under Voliva's court order and the house is now as bare as any vacant house could be. Elder Taylor had held the fort constantly refusing to go outside the residence even for food and, with his family, he sits on the bare floors, determined to remain there and hold the headquarters of the Christian Catholic church in Zion in that particular place. He declares that, as he is Dowie's successor and head of the church, the headquarters must remain there because that was the domicile of the founder of the church and therefore, forever, should remain the official headquarters.

Taylor is prepared to fight the case to the limit and insists that as head of the church he cannot be put out until Voliva has proved that he is not head. Taylor takes the stand that Voliva left the Dowie church, that therefore he cannot lay claim to being the general overseer. Taylor declares that the mere fact they have taken out all the furnishings doesn't deter him in the least in his purpose of holding the fort against all intrusion.

Officers could not get to him to serve the summons hence it was left at the door, service thus being in that way. Taylor is said to be a man of means and willing to spend all his fortune to defend himself.

PUBLIC FAVORS TIN LABELS FOR BREAD

In view of the agitation that has been started in Waukegan relative to the alleged habit of certain bakers of pasting on bread labels with spital of bakers who are chewing tobacco at the time, it has been suggested that a solution of the problem would be to have any baker who wishes to have his label on his bread to have it made of tin.

In speaking of the matter, one man says: I have heard scores of people comment on the subject and all are against the pasting on of labels and all agree that it is a filthy habit, and should not be indulged in simply because it gives the bread a little free advertising.

In some places he continued, I have noticed that the bread labels were made of tin. These labels had sharp prongs which held the label once it was pressed on. These labels are claimed to be perfectly sanitary and far superior to the paper label.

NOTED MARKSMAN DIES OF CANCER OF THE MOUTH

William Dunnill of Fox Lake who has won fame throughout this part of the country, through his ability as a marksman, passed away at the home of A. L. Ward at McHenry on Wednesday after noon of last week, his malady being cancer in the mouth.

The deceased was first taken ill about a year ago and only last week had undergone an operation at a hospital in Chicago. From the effects he never seemed to rally and after hovering between life and death for several days he quietly passed away.

Mr. Dunnill is one of the most widely known residents in the vicinity of Fox Lake.

Increasing Demand for Tungsten.

Tungsten mining and milling near Boulder, Colo., has received a great impetus lately owing to improved methods and better prices. The leading plant of the country, which is in that locality, is now electrically operated entirely and under the new order of things an unprecedented proportion of the tungsten is being recovered. The material is used in the manufacture of improved incandescent electric lamps and the demand for it is increasing daily.

New York's Night Workers.

It is generally supposed that the night workers are few in number, but careful canvass shows that the total number of persons who work after sundown in New York reaches the figure of 52,000. This is equal to the population of each of such cities as Springfield, Mass., Hoboken, N. J., Savannah, Ga., Utica, N. Y., and Elizabeth, N. J.

PRICE OF OIL DROPS

Fight for Oil Monopoly is Extended by Standard to Antioch

KEROSENE DROPS 3 CENTS

Independent Dealers Charge the Drop in Wholesale Price was Made to Drive Them out of Existence

Although representatives of the Standard Oil Company state that the company has made a cut the wholesale prices of gasoline and kerosene, the local merchants state that so far they have not received any cut in the price of the former but that a new schedule of prices has affected the latter.

While the manager of the local branch of the Standard Oil Company refuses to discuss the cutting of prices which is said to have been made in every city or village where there are independent companies, it is charged by the independent dealers that the drop in the wholesale price by the Standard was made to drive them out of existence.

They claim that it is simply a move on the part of the Standard people to gain a monopoly on the business of the country. They also claim that in cities where there is no competition the prices are soaring. At Park City, Utah, the prices are said to be 35 cents per gallon for kerosene and 40 cents per gallon for gasoline. This seems an outrage and it looks as though they were boosting the prices in some places where they have a monopoly in order to make up for the reduction in price in places where there are independent dealers.

In this village the present retail price of kerosene is 10 cents per gallon, or 50 cents per 5-gallon can, the former retail price being 13 cents per gallon or 65 cents per 5-gallon can, this is for the Standard grade. The Pennsylvania, an independent company which is selling what is claimed to be a much higher test and consequently a better grade oil has reduced its price one cent, the former price being 14 cents per gallon or 70 cents per 5-gallon can and the present price being 13 cents per gallon or 65 cents per 5-gallon can. The local merchants state that the Standard is making the wholesale price 4 cents lower per gallon than the Independents.

There has as yet been no reduction in the price of gasoline in this locality, the Standard selling for 17 cents per gallon or 85 cents per 5-gallon can while the Independent is selling for 18 cents per gallon or 90 cents per 5-gallon can. The Standard is underselling the Independent 2 cents per gallon on the whole sale price of kerosene.

HIRAM FERRY LOSES AN EYE IN OPERATION

The many friends of Supervisor Hiram Ferry of Benton, will be sorry to hear that it was found necessary Tuesday in a Milwaukee hospital to remove his right eye, following an infection of about two months. While there has been no complication as yet attending physicians fear that the other eye may become infected through a sympathetic affection which often develops in such cases.

Mr. Ferry began to have trouble with his eye shortly before the county primaries when he was running for county clerk. It resulted from a particle of foreign substance which lodged in the eye and which was not removed for some time. A tumor developed and he found it necessary to go to a Milwaukee hospital where a specialist performed an operation which appeared to be successful.

The eye did not heal, however, and a short time ago began to grow worse rapidly. He went to the hospital in Milwaukee again and Tuesday was obliged to submit to the operation which removed the entire eye.

Priceless Relic Found.

The first original description of America ever written has just been discovered. It was penned by Dr. Diego Alvarez Chanca, physician to the second fleet of Columbus, and was dated at the Port of Isabella, Santo Domingo, in January, 1494. Dr. Fernandez de Ybarra, of the New York Academy of Sciences, with the Smithsonian Institution of Washington, aiding and abetting, uncovered the documents.

ENGINEER FATALLY BURNED

Wm. Strommer of Chicago, Scalded in Railroad Accident at Lake Bluff

DIES AT McALISTER HOSPITAL

Engine of Fast Freight Plunges Down Embankment, Taking Engineer With it—Fireman Jumps

William Strommer, an engineer on the Chicago and Northwestern railroad, died in the Jane McAlister hospital Waukegan, Wednesday morning at 5:40 o'clock as the result of burns received early last Saturday morning when an accident at Norton Park near Lake Bluff caused his engine to leave the rails and plunge down a steep embankment upon its side.

His body was taken to the Larson and Conrad undertaking rooms and was later shipped to his home at 5015 Washington Boulevard, Chicago. His burns proved to be more serious than was at first thought to be the case as it was believed at first that he had a good chance for recovery.

Mr. Strommer was in charge of a freight train which runs between Chicago and Racine.

The engineer had made the trip to Racine and had returned to Norton Park on the west division of the Northwestern to pick up his train. The accident is accounted for in two ways. One is that the engine ran into an open switch and was derailed and the other is that the rails spread, causing the heavy engine to turn on its side and plunge over the bank.

The fireman jumped when he saw the impending danger but the engineer stuck to his post and was caught under a portion of the machinery when the engine struck the bottom of the ditch. The escape valve opened in the fall and before fellow employes of the road could reach him the unfortunate man had been badly scalded by steam.

He was extricated at last and taken to Waukegan, being removed to the Jane McAlister hospital where physicians held out hopes for his recovery. The burns extended over nearly every part of his body.

C. & M. E. STATION AT ROCKEFELLER IS WRECKED

Vandals broke into the station of the C. & M. E. at Rockefeller Sunday and wrecked the place. It is thought that the entrance to the station was obtained through the window and then proceeded to wreck the place.

They tore out a huge partition in the station and committed other acts of depredation. The attorney for the road is on the trail of two young men of Libertyville who are thought to have been mixed up in the deed.

If the young men in question can be caught they will be prosecuted to the extent of the law. There is a sign posted on all the smaller stations along the right-of-way that warns would-be destroyers that they will be arrested if caught in the act of committing any nuisance thereon, and it will go hard with them if caught.

It is thought that the motive was robbery, but the station at that place is used as a waiting room only and there are no tickets or money in the station.

Forced To Leave Home.

Every year a large number of poor sufferers whose lungs are sore and racked with coughs are urged to go to another climate. But this is costly and not always sure. There's a better way. Let Dr. King's New Discovery cure you at home. "It cured me of lung trouble," writes W. B. Nelson, of Calamine, Ark., "when all else failed and I gained 47 pounds in weight. Its surely the King of all cough and lung cures." Thousand owe their lives and health to it. Its positively guaranteed for coughs, colds, lagrippe, asthma, croup—all throat and lung troubles; 50c and \$1.00. Trial bottle free at J. H. Swans.

Making the Best of It.

Uncle Jack came to visit the family just after his young name-ake had recovered from an attack of the whooping cough. "How did you amuse yourself while you had it?" he asked. "Me and another little boy who had it played Indians and had warwhoops," explained Jack.

TOWN DESIRES NEW TRIAL

Attorneys for Town of Salem Ask that Verdict of Jury be Modified.

Attorney R. V. Baker, who appeared for the Town of Salem in the suit brought against that town by Edward Collier in which the plaintiff was given damages to the amount of \$1,500, on Thursday last appeared before Judge Belden and asked to have the verdict of the jury modified by changing answers to the questions relating to the negligence of the plaintiff. He also filed a motion for a new trial in the case. No decision on the motions was made by the court and they will be argued later in the term.

It is understood that that the case will be taken to the supreme court, the town board expecting the reversal of the verdict of the jury on the grounds that Collier was guilty of contributory negligence.

Many interesting points have been brought up during the trial and the case is one that has attracted wide spread interest in this township as well as in the township most immediately concerned. One of the latest developments in the case is that on account of repeated charges of bribery in connection with the jury which recently heard the suit Sheriff William Gunter has applied to Judge E. B. Belden of the First Wisconsin circuit to have the jury questioned, as the stories are a direct reflection on the sheriff's office.

ARREST THREE HUNTERS

Two Waukeganites and one Chicagoan Netted in Woods Near Taylor Grove

Two Waukeganites and one Chicagoan visiting with them, were Sunday arrested at Taylor Grove, Ill., by Deputy Game Warden George Holland and Charles Brewer, and taken to Waukegan, where they were placed in custody and fined.

The arrests are part of a warfare that the enraged Lake county farmers are waging against alleged lawless hunters from the city. Only last week a brush fire, started by some Chicago hunter, scorched acres of land near Taylor Grove. In the woods about the village is a thick brush. There is also stock loose in the woods while huntersmen are common. The result might be, if reckless hunters acted as they generally do, that the death of human beings or of stock might easily take place.

The three arrested were Joseph Inda, Leo Manma and John Koloska, the last named of Chicago. They were hunting without a license, it is alleged, and when apprehended had two rabbits in a bag. They did not offer any resistance and were first brought before Justice John Murray of Russell, afterwards, when they could not pay their fines, being taken to Waukegan by buggy and electric car.

The correct names of the three arrested are: Joseph Inda, Frank Sluski and Joe Dama. They were heavily fined and the fines were suspended. The fines were suspended at the direct instance of Mayor Buck, due to the fact that one, at least, of the men has a large family.

Yesterday's Wisdom, Today's Folly.

When we get swell-headed in human pride of human knowledge our feathers are bound to fall if we think what posterity will think of us—judged by what we think of the knowledge of most of these before us. Jefferson and Voltaire not so long ago held a correspondence as to why sea shells were found on mountain tops, and whether such shells were not a spontaneous growth there never even dreaming that such mountain tops were once the bottom of the sea. Leibnitz, writing to the queen of Prussia of the sun spots, called them "beauty spots," and used them as a courtly justification of the old queen's several court plaster patches on her royal mug. Kepler took the tides for the breathing of the earth, which he held to be a living animal. Blackmore went him one better by saying eruption of Mount Etna came from the world having a bad case of colic.

Altogether Different Thing.

It is singular that those persons who talk most loudly about their bad luck never ascribe any successes they may achieve to good luck. These are always due to their own good management, and they complacently take great credit therefor.

Kills A Murderer.

A merciless murderer is appendicitis with many victims. But Dr. King's New Life Pills kill it by prevention. They gently stimulate the stomach liver and bowels, preventing that clogging that invites appendicitis, curing constipation, headache, biliousness, and chills. 25 cents at Swans' drug store.

FARMERS AGAINST THE TEST

Expert Condemns Pasteurization a Makeshift and a False Safeguard

DISEASE SPREAD BY TEST

Health Commissioner Cross Examines a Witness Offered by Dairymen Who are Opposing Law

Pasteurized milk vs. raw milk, the principal subject of discussion before the joint legislative committee appointed to investigate the merits of pasteurization and the tuberculin test Thursday, in Chicago, led to a series of tilts between Health Commissioner Evans and Dr. Edward Gudeman.

Dr. Gudeman was introduced as an expert, but cross examination brought out the fact that he is a consulting chemist in the employ of Borden's Condensed Milk company. Dr. Gudeman said he did not represent the Borden company.

"Pasteurization," said Dr. Gudeman, "is a false safety guard. The fact that pasteurized milk may be four or five days old before there is any indication to the consumer of its age, is a real danger."

"Pasteurization I consider as a makeshift. The important thing is to have the milk clean. I consider it of the utmost importance that the city or state exercise control and supervision of the milk supply from the cow to the consumer."

"If done immediately before the milk is consumed, pasteurization or sterilization would be a good thing. Milk that is pasteurized should never be over twenty-four hours old."

The committee's sessions are being held in the law office of Speaker Edward D. Shurtleff, chairman of the committee.

Farmer witnesses from Cook, McHenry, Kane and DuPage counties testified that not only has milk from tuberculin tested cows caused illness and disease among the users of the product, but that cows free from all traces of tuberculosis have contracted the disease after being subjected to the tuberculin test.

According to testimony of some of the witnesses, it would be most unfortunate for the health of the people of Illinois, not to mention the fearful havoc to dairy herds, to compel the farmers to have their milk cows subjected to the tuberculin test.

E. J. Fellows, president of the Milk Producers' Association, was the star witness for the opponents of pure milk legislation.

"I have known healthy cattle injected with tuberculin to develop tuberculosis," he said. "In fact, I believe more cows are infected by the injection of tuberculin than cases of tuberculosis are discovered through this test. The government vaccine can't be depended upon, either, any more than can the vaccine made by private companies."

NEW LAW IN STATE OF WISCONSIN

A new law goes into force in the state of Wisconsin the first of December of the present year, which provides that no cattle in that state can be sold for any other purpose than feeding or slaughtering, which have not been tested for tuberculosis.

Violation of this law is punishable with a fine of not less than twenty-five dollars or more than five hundred, or by imprisonment in the county jail for not less than ten days or more than sixty days.

Veterinarians and others licensed to make the tuberculin tests are H. Smith New Munster; Geo. Belmer and A. D. Paddock, Salem; and W. D. Sheen, Trevor.

Women Little Thought Of.

Among some Brazilian tribes it is believed that the presence of woman will hinder wine from fermenting. In Nutchahya should a woman happen to touch or sit near an object put under taboo, and rendered sacred and inviolable because of its contact with man, it cannot be further made use of, and she has to pay the penalty with her life in consequence. In Tahiti women must respect the places resorted to by men, as well as their fishing tackle and weapons.—North American Review.

The Courage of Captain Plum

By JAMES OLIVER CURWOOD

Illustrations by Magnus G. Kettner

(Copyright 1908 by Hobbs-Merrill Co.)

SYNOPSIS.

Capt. Nathaniel Plum, of the sloop Typhoon, lands secretly on Beaver Island, stronghold of the Mormons. He is suddenly confronted by Obadiah Price, an eccentric old man and a member of the Mormon council, who tells him that he is expected. Price ignores Nat's protestations that he has got the wrong man, and bargains for the ammunition aboard the sloop. He binds Nat by a solemn oath to deliver a package to Franklin Pierce, president of the United States. Near Price's cabin Nat sees the frightened face of a young woman who disappears in the darkness, leaving an odor of lilacs. It develops that Plum's visit to the island is to demand settlement from the king. Strang, for the looting of his ship some time previously by Mormons, Casey, the mate, has been left in charge of the sloop with orders to bombard St. James if Nat does not return within a certain time. Price takes Nat to the darkness, to the king's home, and through a window he sees the king and his wives, among whom is the lady of the lilacs, whom Price says is the seventh wife. Plum calls at the king's office where he is warned by a young woman that his life is in danger. Price receives Plum cordially, professes indignation when he hears the captain's grievance, and promises to punish the guilty. Plum again receives warning of his danger. He receives Nell, who is being publicly whipped, among other orders. Arbor Croche, the sheriff and father of Wyan, some, the girl who warned Nat, to pursue and kill the two men. Plum and Nell are sent to the sloop. Price carries her off on the ship. Nell approves. They agree to include Winsome, with whom Price is in love, in the enterprise. Nat discovers that the sloop is gone.

CHAPTER VI—Continued.

He would go to the councilor's. Having once decided, Nathaniel turned in the direction of the town, avoiding the use of the path which he and Obadiah had taken, but following in the forest near enough to use it as a guide. He was confident that Arbor Croche and his sheriffs were confining their hunt to the swamp, but in spite of this he exercised extreme caution, stopping to listen now and then, with one hand always near his pistol. A quiet gloom filled the forest and by the tree tops he marked the going down of the sun. Nathaniel's ears ached with their strain of listening for the rumbling roar that would tell of Casey's attack on St. James. Suddenly he heard a crackling in the underbrush ahead of him, a sound that came not from the strain of listening for the rumbling roar and in a moment he had dodged into concealment of the huge roots of an overturned tree, drawn pistol in hand. Whatever object was approaching came slowly, as if hesitating at each step—a cautious, stealthy advance, it struck Nathaniel, as he checked his weapon. Directly in front of him, half a stone's throw away, was a dense growth of hazel and he could see the tops of the slender bushes swaying. Twice this movement ceased and the second time there came a crashing of brush and a faint cry. For many minutes after that there was absolute silence. Was it the cry of an animal that he had heard—or of a man? In either case the creature who made it had fallen in the thicket and was lying there as still as if dead. For a quarter of an hour Nathaniel waited and listened. He could no longer have seen the movement of bushes in the gathering night gloom of the forest but his ears were strained to catch the slightest sound from the direction of the mysterious thing that lay within less than a dozen rods of him. Slowly he drew himself out from the shelter of the roots and advanced step by step. Half way to the thicket a stick cracked loudly under his foot and as the sound startled the dead quiet of the forest with pistol-shot clearness there came another cry from the dense hazel, a cry which was neither that of man nor animal but of a woman; and with an answering shout Nathaniel sprang forward to meet there in the edge of the thicket the white face and outstretched arms of Marlon. The girl was swaying on her feet. In her face there was a pallor that even in his instant's glance sent a chill of horror through the man and as she staggered toward him, half falling, her lips weakly forming his name Nathaniel leaped to her and caught her close in his arms. In that moment something seemed to burst within him and food his veins with fire. Closer he held the girl, and heavier he knew that she was becoming in his arms. Her head was upon his breast, his face was crushed in her hair, he felt her throbbing and breathing against him and his lips quivered for freedom in his soul. But first there came the girl's own whispered breath—"Nell—where is Nell?" "He is gone—gone from the island!" She had become a dead weight now and so he knelt on the ground with

her, her head still upon his breast, her eyes closed, her arms fallen to her side. And as Nathaniel looked into her face from which all life seemed to have fled he forgot everything but the joy of this moment—forgot all in life but this woman against his breast. He kissed her soft mouth and the closed eyes until the eyes themselves opened again and gazed at him in a startled, half-understanding way, until he drew his head far back with the shame of what he had dared to do flaming in his face.

And as for another moment he held her thus, feeling the quivering life returning in her, there came to him through that vast forest stillness the distant deep-toned thunder of a great gun.

CHAPTER VII.

The Hour of Vengeance.

For perhaps 20 seconds after the last echoes of the gun had rolled through the forest the girl lay passive in Nathaniel's arms, so close that he could feel her heart beating against his own and her breath sweeping his face. Then there came a pressure against his breast, a gentle resistance of Marlon's half-conscious form, and when she had awakened from her partial swoon he was holding her in the crook of his arm. It had all passed quickly, the girl had rested against him only so long as he might have held a dozen breaths and yet there had been all of a lifetime in it for Nathaniel Plum, a cycle of joy that he knew would remain with him forever. But there was something bitter-sweet in the thought, that she was conscious of what he had done, something of humiliation as well as gladness, and still not enough of the first to make him regret that he had kissed her; that he had kissed her mouth and her eyes. He loved her, and he was glad that in those passing moments he had betrayed himself. For the first time he noticed that her face was scratched and that the sleeves of her thin waist were torn to shreds; and as she drew away from him, steadying herself with a hand on his arm, his lips were parched of words, and yet he leaned to her eagerly, everything that he would have said burning in the love of his eyes. Still irresolute in her faintness the girl smiled at him, and in that smile there was gentle accusation, the sweetness of forgiveness, and measureless gratitude, and it was yet light enough for him to see that with these there had come also a flush into her cheeks and a dazzling glow into her eyes.

CHAPTER VI—Continued.

"Nell has escaped!" she breathed. "And you—" "I was going back to you, Marlon!" He spoke the words hardly above a whisper. The beautiful eyes so close to him drew his secret from him before he had thought, "I am going to take you from the island!"

With his words there came again that sound of a great gun rolling from the direction of St. James. With a frightened cry the girl staggered to her feet, and as she stood swaying unsteadily, her arms half-reached to him, Nathaniel saw only mortal dread in the whiteness of her face.

"Why didn't you go? Why didn't you go with Nell?" she moaned. Her breath was coming in sobbing excitement. "Your ship is at—St. James!" "Yes, my ship is at St. James, Marlon!" His voice was tremulous with triumph, with gladness, with a tenderness which he could not control. He put an arm half-round her waist to support her trembling form and to his joy she did not move away from him. His hand was buried in the richness of her loose hair. He bent until his lips touched her silken tresses. "Nell has told me everything—about you," he added softly. "My ship is bombarding St. James, and I am going to take you from the island!"

Not until then did Marlon free herself from his arm and then so gently that when she stood facing him he felt no reproach. No longer did shame send a flush into his face. He had spoken his love, though not in words, and he knew that the girl understood him. It did not occur to him in those moments that he had known this girl for only a few hours, that until now a word had never passed between them. He was conscious only that he had loved her from the time he saw her through the king's window, that he had risked his life for her, and that she knew why he had leaped into the arena at the whipping-post.

The words she spoke now came like a dash of cold water in his face. "Your ship is not bombarding St. James, Captain Plum!" she exclaimed. Darkness hid the terror in her face, but he could hear the tremble of it in her voice. "The Typhoon has been captured by the Mormons and those guns are—guns of triumph—and not—" She caught her breath in a convulsive sob. "I want you to go—I want you to go—with Nell!" she pleaded.

"So Casey is taken!" "He spoke slowly, as if he had not heard her last words. For a moment he stood silent, and as silently the girl stood and watched him. She guessed the despair that was raging in his heart, but when he spoke to her she could detect none of it in his voice. "Casey is a fool," he said, unconsciously repeating Obadiah's words. "Marlon, will you come with me? Will you leave the island—and join your brother?" "The hope that had risen in his heart was crushed as Marlon drew farther away from him. "You must go alone," she replied.

With a powerful effort she steadied her voice. "Toll Nell that he has been condemned to death. Toll him that—if he loves me—he will not return to the island."

"And I?" "From the distance she saw his arms stretched like shadows toward her.

"And you—" "Her voice was low, so low that he could hardly hear the words she spoke, but its sweetness thrilled him.

"And you—if you love me—will do this thing for me. Go to Nell. Save his life for me!"

She had come to him through the gloom, and in the luster of the eyes that were turned up to him Nathaniel saw again the power that swayed his soul.

"You will go?" "I will save your brother—if I can!" "You can—you can—" she breathed, in an ecstasy of gratitude she seized one of his hands in both of her own. "You can save him!"

"For you—I will try." "For me—" "She was so close that he could feel the throbbing of her bosom. Suddenly he lifted his free hand and brushed back the thick hair from her brow and turned her face until what dim light there still remained of the day glowed in the beauty of her eyes.

"I will keep him from the island if I can," he said, looking deep into them, "and as there is a God in heaven I swear that you—" "What?" she urged, as he hesitated. "That you shall not marry Strang!" he flashed.

A cry welled up in the girl's throat. Was it of gladness? Was it of hope? She sprang back a pace from Nathaniel and with clenched hands waited breathlessly, as if she expected him to say more.

"No—you cannot save me from Strang! Now you must go!" She retreated slowly in the direction of the path. In an instant Nathaniel was at her side.

"I am going to see you safely back to St. James," he declared. "Then I will go to your brother."

She barred his way defiantly. "You cannot go!" "Why?" "Because—" He caught the frighten-

ed flutter of her voice again. "Because—they will kill you!"

The low laugh that he breathed in her hair was more of joy than fear.

"I am glad you care—Marlon." He spoke her name with faltering tenderness, and led her out into the path.

"You must go," she still persisted. "With you—yes," he answered. (TO BE CONTINUED.)

Officers Must Wear Mustaches. Some of the cavalry subalterns at Aldershot are smitten in a tender place by the enforcement of the order that all officers must wear a mustache. The regulation on the subject is explicit and dates from the time of Queen Victoria. It reads as follows:

"The hair of the head will be kept short. The chin and underlip will be shaved, but not the upper lip. Whiskers if worn will be of moderate length."

The fad for shaving the upper lip is a specialty of cavalry subalterns, who wish to distinguish themselves from their comrades of other branches of the service. Field Marshal Lord Grenfell had to issue an order calling attention to the regulation when he was in command in Ireland.

The regulation aims entirely at maintaining a smart appearance and dates from shortly after the Crimean war, when Queen Victoria objected to her soldiers wearing beards. In the navy the rule is that an officer must be either clean shaven or wear "a full set."—London Daily Mail.

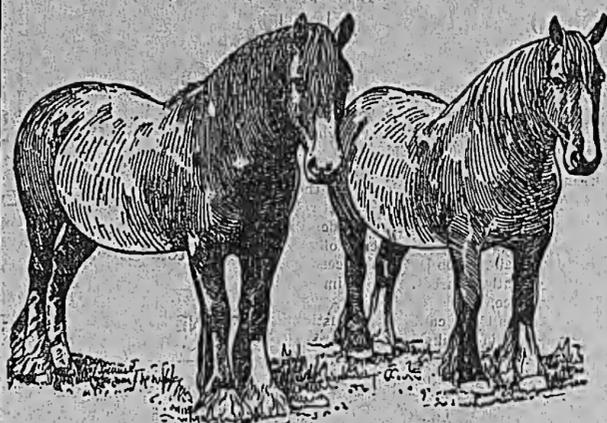

Why Doctors Bear Charmed Lives. The reason doctors do not catch disease is because they never think about it. They very seldom take any precautions to secure this amazing immunity, beyond, perhaps, a cold sponge bath regularly, smoking a pinch of snuff, gargling the throat with some well-known disinfectant, or washing their hands in an aseptic solution before and after attending to a patient. A doctor may carry disease from one house to another without contracting it himself. An army surgeon had to cope single-handed with a terrible outbreak of cholera. When the rush was over, the medical man, absolutely exhausted sank onto a bed which a short time previously had been occupied by a had cholera case and slept for 43 hours. Yet he did not contract the complaint, although he had taken no preventive measures. He simply didn't think about it. And that is the whole secret.

"I Am Going to Take You From the Island."

LABOR INVOLVED MAKES DRAFT HORSES PROFITABLE

No Class of Stock Will Give Better Returns Than Animals With Weight and Quality—Care of Colt.

Prize Winning English Draft Mares.

The colt should have a roomy box stall. If you have two colts, keep them together when the mares are at work, as there is no animal that likes company better than a colt, says a writer in American Cultivator. As they get older see that they have plenty of good clover hay and bright oats to eat. It is well to have a little pasture near the barn and let them into this when the mares are at work. Have this fenced with good, woven wire, high enough so they cannot get their heads over it. The pasture should be arranged so they can run into the barn to get away from the flies. Leave the cover to the oak box open, so they can help themselves. Keep a pail of water in the stall where they can reach it. After a little you can mix skim milk with the water, later give them clear skim milk, but let them have what water they want at all times. Some colts will take skim milk at once, but be careful and not give them too much to commence with, say two quarts at first, and as they get accustomed to it you can give them five or six quarts twice a day. This you can feed all winter, and they will go on to pasture in the spring in fine shape. If they are eating oats and drinking milk at weaning time there will be no setback, which always occurs if they are not. When they are about a year old and on the pasture, we gradually wean them from the oats and milk, and

they get nothing but pasture until fall, when they are again fed grain and hay. We always stable all of our colts at night, but they have a roomy yard or field to run in in the day time, so that they get plenty of exercise. We always break our colts to harness before they are three years old. Get them used to the harness before spring work begins. Work them only half a day at a time to commence with, and see that their collars and harness fit them well. When the weather gets warm clip your colts. By so doing you may avoid sore shoulders. If a colt gets a sore shoulder, let him rest a few days and heal it up. If you continue to work him and the sore keeps getting worse, you may have a shoulder that will always bother you when he is put to hard work. We aim to sell all of our geldings before they are seven years old. When you intend to sell your horses see that they are in proper shape. They should be fat, as that is what the market demands. Feed them on good wholesome food; corn can be fed to quite an extent at this time, with bran and a little oil meal. By breeding the right horses, those with weight and quality, I know of no class of stock that will bring better returns for our high-priced feeders (considering the amount of labor involved) than good draft horses.

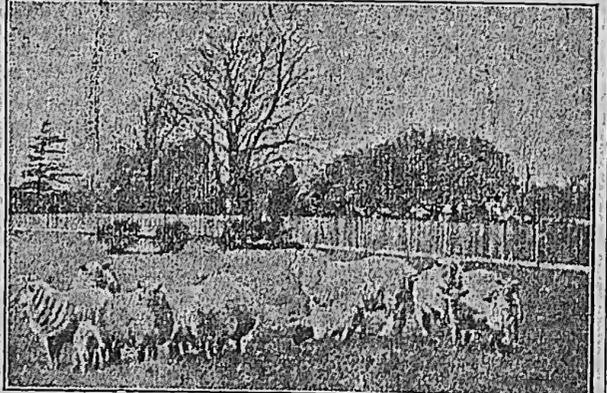

APPLE CULLS CAUSE LOSS

It Will Prove Profitable to Squeeze Juice Out of Discards and Sell in Natural State.

(By JOHN J. TENNES.) The amount of money lost by farmers every year through lack of interest or knowledge of the means to dispose of unmarketable apples has never been estimated. That is one of the big wastes on every farm where many apples are grown and where commercial fruit raising is made the main feature of the farm. Even the orchardist who is in the business as a specialist must suffer more or less in his culls. As 95 per cent. of ripe apples is juice which sells for good prices either in its natural state or as vinegar, it pays big to squeeze out this product through a press instead of allowing it to go to waste. There are many kinds of elder presses, but an hydraulic machine, extracts the very last possible drop of juice to be obtained and leaves very little substance to be thrown away. The first advantage gained by working up unmarketable fruit into elder is that it is converted into a condensed and portable form convenient for handling and storing. The second object is to convert this valuable portion of the crop into a marketable commodity, which would otherwise be wasted and lost. The cost, the time and labor of working up several hundred bushels of apples into elder is only nominal as compared with the value of the elder itself if properly handled. Apples that have been bruised in handling, are imperfectly developed, too small and garbled apples which would not be worth the cost of packing, can be utilized in this manner and the orchardist's revenue largely enhanced. The maximum of successful financial enterprises are applicable to the business of a practical orchardist as to any other. The little things must not be overlooked; all the byproducts must be utilized, for from them is derived much of the profit.

Burn Cabbage Stumps. Do not leave the old cabbage stumps sticking up out of the ground. They look slowly and breed fungous pests. Pull them up and burn them.

OXFORD SHEEP VERY PROLIFIC

The Oxford sheep originated in England in the early part of the nineteenth century from a cross of Cotswold and Hampshire Downs. They have been known since 1857 as Oxfordshire or Oxford Downs, and are now widely distributed over the United States and Canada. They are the largest and heaviest of the Down breeds. When in good flesh the rams should weigh 250 to 275 pounds and the ewes from 200 to 225 pounds. The wool is rather coarser than any other of the medium wool breeds and the

fleeco is heavier, weighing from 10 to 12 pounds unwashed. The face is usually an even dark gray or brown, with or without a gray spot on the lip of the nose. They are best adapted for lands furnishing good pasture, and do not succeed as well under range conditions or on rugged, broken pastures. The ewes are very prolific, triplets being not uncommon. The lambs grow very rapidly and are of good form. The chief shortcoming of the breed is that it is not as hardy as some others.

SUPPLY ALWAYS KEPT UP

Babies come down from heaven, mamma, There's one thing that's sure, I declare— There's no many babies that come down each day. There can't be race suicides there.

A Logical Landlord. Many a tenant will sympathize with the man in his story, from the Philadelphia Record. He was renting a small house which the landlord had refused to repair. One day the owner came to see him. "Jones," he said, "I shall have to raise your rent." "What for?" asked Jones, anxiously. "Have taxes gone up?" "No," the landlord answered, "but I see you've painted the house and put in a new range and bathtub. That, of course, makes it worth more rent."

\$100 Reward, \$100. The readers of this paper will be glad to learn that there is at least one disease that science has been able to cure in all its stages, and that is Catarrh. Halls' Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Halls' Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for literature. Address: HALL'S CATARRH CURE CO., TOLEDO, O. Sold by all Druggists. Take Halls' Family Pills for constipation.

The Difference. "I don't see any difference between you and a trained nurse except the uniform," said her sick husband. "And the salary," she added, thoughtfully.—Harper's Nazar.

When it comes to facing an enemy some men show their retiring dispositions.

Mrs. Winslow's Soothing Syrup. For children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, &c. &c. &c.

Some politicians are too modest to face the nude truth.

Many who used to smoke 100 cigars now buy Lewis' Single Binder straight 60.

A stitch today may save a patch tomorrow.

Make the Liver Do its Duty. Nine times in ten when the liver is right the stomach and bowels are right. CARTER'S LITTLE LIVER PILLS. Genuinely but firmly compel a lazy liver to do its duty. Cures Constipation, Indigestion, Sick Headache, and Distress after Eating. Small Pill, Small Dose, Small Price. Genuine must bear Signature. Beathood.

The par excellence of all razors. Gillette. KNOWN THE WORLD OVER.

ACTIVE LADY. Heatherbloom Taffeta Petticoats. Every garment guaranteed for one year or will be replaced with a new one free. Customers already waiting. Special opportunity for right party. Send for free sample offer. GEORGE A. PARKER COMPANY. Dept. P. 720 Chestnut Street, Philadelphia, Pa.

PARKER'S HAIR BALM. Cleanses the scalp, promotes a luxuriant growth, restores color to faded hair, cures itching scalp, dandruff, and all hair troubles. 25c and 50c at Druggists.

OLD SORES CURED. Allen's Ointment cures Chronic Ulcers, Bone Ulcers, Scalds, Burns, Erysipelas, Ulcers, Abscesses, Hemorrhoids, Piles, and all other skin diseases. Sold by all Druggists.

SOILED DRESSES. Washes, Gents' Suits, Carpets, Portieres, Plumes, etc. Feed to Whinnies, a new and reliable method. Largest Cleaning and Dyeing Establishment in West. You will get them back cleaned or dyed and pressed satisfactorily. Write for prices.

25 ASSORTED HANDSOME PICTURES. FULLY ILLUSTRATED. Sent postpaid on receipt of ten cents. Many other articles equally cheap. Write for bargain list. Manhattan Trading Company, 20 Chambers St., New York City.

\$5 CASH and 25¢ PER MONTH pays for 10 bottles of Allen's Ointment. 1 to 10 gal. cap. guaranteed. Free from your own home. No first. Mason Mfg. Co., Dept. A, Canton, O.

REMEMBER PISO'S for COUGHS & COLDS.

Why We Should Fertilize the Soil

by BURT E. POWELL

MAN'S best friend is his mother—the earth. All she asks is the opportunity and she will yield him the wealth of an account that has been growing for ages. And he has treated her as he usually treats his best friends. He has taken all she had to give, bought an automobile and a house in town, and then hid his address from his relatives of the soil for fear they would bring their earthy smell into his new residence.

With quiet indifference old Mother Earth endures this ingratitude, but the time comes when she has nothing for his greed. What happens then? Look to India for one answer. Ten million of our own Aryan blood starve there in a single famine year—starve upon a soil that once was, and still could be, almost inconceivably fertile.

Russia offers another reply, where with stomachs empty men enter a world that never fills them. Yet another answer, centuries old, may be found in the Tigris-Euphrates valley, which, once marvelously fertile, now scorchers uselessly in the tropic sun. The necessity of man forged a weapon that brought him plenty; but the greed of man forged a weapon that brought him penury. For do you think there can be prosperity when the earth no longer yields? Do not forget that the shame of Rome was coincident with the time when one bushel of seed returned but four in the harvest. When the soil exploited, that is when it is so farmed that the essential elements are taken out in crops and nothing returned to build it up, the result

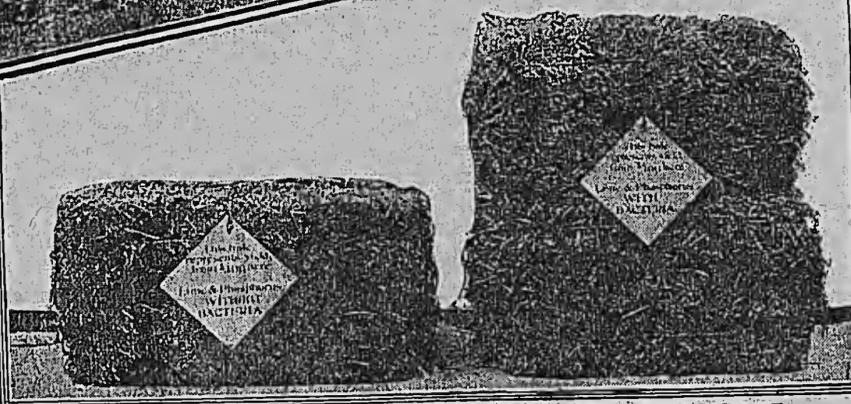

TWO FIELDS OF CLOVER IN SOUTHERN ILLINOIS SHOWING EFFECT OF USING LIME STONE, ROCK PHOSPHATE, IN ADDITION TO MANURE!

CORNFIELD IN URBANA, ILL. 3 YEAR ROTATION, NO TREATMENT

is exactly the same as when men are exploited in workshops and nothing returned to build up their bodies. You cannot haul phosphorus and nitrogen in oats and wheat and corn from your farms year after year and maintain the fertility of the soil, if you give back no phosphorus and nitrogen in return. Twelve thousand abandoned farms in the state of New York alone testify to this. After sixty years of cultivation the lands of the corn belt are beginning to hint at the same thing.

ALFALFA - SHOWING ADVANTAGE OF HAVING THE SOIL INVOLUCATED WITH BACTERIA

let us consider a few fundamentals of crop growing.

First, there are six positive, absolutely essential factors. They are: (1) the seed, (2) the plant home, (3) the food of which the plant is made, (4) moisture, (5) heat, (6) light. Now, except in the case of the seed and plant food these factors are largely beyond the farmer's control. Dame Nature can, however, be trusted to attend to them satisfactorily. How, then, has the farmer made use of his ability to control the two factors? By exercising judgment and care in the selection of seed and by ignoring the matter of plant food entirely. The result? When the land was worn out and had no plant food to give the good seed the agriculturist rose traitorily in farmers' institute and told what he thought of the seed seller. The trouble all the time was not with the seed but with the soil, which had had the elements of plant food removed in previous crops, and as a consequence could not respond to the call of the seed.

What are these elements? There are ten in the list, but eight are provided abundantly. Three—oxygen, hydrogen and carbon—come directly from the air and water. Most normal soils contain enough potassium, magnesium, iron, calcium and sulphur, although sometimes the first must be supplied. The problem of plant food, therefore, narrows itself, in most cases, to maintaining and increasing the phosphorus and nitrogen.

Now nitrogen is as easy to catch as the measles if one knows how. The air contains it in inconceivable amounts. Dr. Hopkins has estimated that the air above an acre of ground contains about \$10,000,000 worth. It sold over the counter at ordinary commercial rates. In the order to induce this nitrogen to enter the earth, where it may reappear as food for man, earth, where it is necessary to plant clover, alfalfa, peas or any legume. By means of the bacteria upon the roots these legumes draw the nitrogen into the soil. How necessary the element

of nitrogen may be seen from the fact that a 100-bushel crop of corn takes from the soil almost 100 pounds of nitrogen in the corn and about 48 pounds in the stalks. Rich, well-balanced land in the corn belt contains about 3,000 pounds of nitrogen. Therefore, if the process of subtraction of nitrogen goes on year after year with never an addition, it can be seen clearly that the farmer's finances cannot multiply. Rotation plans for grain farmers always should include a crop of legumes. Wheat, corn, oats and clover is a satisfactory rotation; also wheat, corn and cow peas; also cotton, corn and cow peas. The first of these rotations should include a catch crop of clover seeded the first year and plowed under for corn as late as practicable the second year. The other two should include catch crops of legumes whenever possible. Legumes when plowed under perform valuable services besides supplying the soil with nitrogen—as they decay they supply organic matter to the soil which helps other elements of plant food to free themselves from the earth and into the farmer's bank account.

Now that the question of nitrogen has been outlined, suppose we turn to the problem of phosphorus, the only element of plant food we ever shall have to buy. As to the importance of the use of phosphorus upon the common soils of the United States, Dr. Hopkins has this to say:

"Phosphorus is the key to permanent agriculture on these lands. To maintain or increase the amount of phosphorus in the soil makes possible the growth of clover or other legumes and the consequent addition of nitrogen from the inexhaustible supply in the air; and with the addition of decaying organic matter in the residues of clover and other crops and in manure, made in large part from clover, hay and pasture, and from the larger crops of corn and other grains which clover helps to produce comes the possibility of liberating from the immense supplies in the soil sufficient

potassium, magnesium and other essential abundant elements supplemented by the amounts returned in manure and crop residues for the production of large crops at least for thousands of years; whereas if the supply of phosphorus in the soil is steadily decreased in the future in accordance with the past and present most common farm practice, then poverty is the only future for the people who till the common agricultural lands of the United States."

Phosphorus may be applied in liberal amounts—as much as 1,000 pounds to the acre every three or four years—and it costs about \$7 a ton.

After the problem of returning the elements to the soil has been solved the farmer may find another condition of the soil which must be corrected before his farm will produce as it should. This is the tendency of certain soils to acidity. Clover, alfalfa and other valuable legumes cannot thrive upon soil that is sour. Sometimes on acid soils when applications of farm manure are made, the legumes will seem to grow well, but examination reveals the fact that the nitrogen gathering bacteria fail to develop properly. Hence the most valuable contribution the legumes have to make to the soil is largely lost. Upon certain fields belonging to one of the most famous agricultural stations in the world, that of Rothamstead, England, applications of natural limestone were made a century ago. They are still moderately productive, although other fields near by, which have never received the application, are extremely unproductive.

Care should be taken that limestone is used for the one and only purpose of correcting soil acidity.

And while we are upon this subject of soil stimulation, have you ever thought that most of our improvements have that in view and that only? Improved seed, improved machinery, irrigation, even crop rotation, all are means for extracting from the soil the richness that is in it, not for returning any of the food elements of grain building. All of these food elements of grain building, are excellent in methods of soil stimulation are excellent in their way, if used in connection with methods of returning the elements of plant food; but if used without them they are means of hastening the impoverishment of the soil.

To return to the question of limestone, one ton to the acre finely ground will correct the acid condition of most soils. It is, however, in the end cheaper and easier to apply more and to apply it less often. As much as ten tons to the acre was applied to the soil of one of the experiment fields in southern Illinois and the crop yields there have been greater than upon any other fields in that district.

A question that has been given much attention lately is the question of crop rotation. Undoubtedly it is absolutely essential for successful grain farming; but it is not the universal panacea some would have us believe. For instance, a group of theorists have declared that fertilization is unnecessary, that crop rotation will keep the soils in perfect condition. The idea is that plants do not injure the soil because they use its plant food elements but because they throw off poisonous excreta as animals do. Therefore a so-called worn-out soil simply has become saturated with this excreta. Plant a crop which will neutralize the poison of the last crop and the soil will be sweetened and the breasts of Mother Earth kept dripping with plenty forever. This is very attractive—as a theory. It has, however, no foundation in fact. As Dr. Hopkins has said, the rotation of crops has just the same effect upon "wealth in the soil" as the rotation of the check book among the members of the family has upon the wealth in the bank. Plant food elements cannot be used up and not returned without resulting in impoverishment of the soil.

NATURAL ACT FOR MOTHER

Women Understand That Not Heroism but Simply Love Prompted Self Sacrifice.

A few days ago, in a somewhat squalid neighborhood, a house caught fire. The flames shot quickly through the litter on the floor and the untidy array of clothing on the walls. A woman talking with a neighbor ran screaming to the house and, without an instant's hesitation sprang through the smoking doorway into what already seemed an inferno. A moment later she staggered out, her hands and face blackened and blistered and her clothing on fire. In her arms she bore her baby, safe from harm.

The afternoon papers came out with the story, printed under headlines extolling this mother's heroism. Men read it on street cars, and as their eyes glanced with the stirring of the spirit which leaps to greet noble deeds they said: "That woman dared to do what most men would be afraid to do." But the mothers who read it at home did not think that way. Perhaps the danger to the baby, the wrecking of the home and the burns the woman suffered brought moisture to their eyes, but to them the act was not one of heroism—it was simply what any natural mother, no matter how timid, would do under the same circumstances.—Cleveland Leader.

REST AND PEACE

Fall Upon Distracted Households When Cuticura Enters.

Sleep for skin tortured babies and rest for tired, fretted mothers is found in a hot bath with Cuticura Soap and a gentle anointing with Cuticura Ointment. This treatment, in the majority of cases, affords immediate relief in the most distressing forms of itching, burning, scaly, and crusted humors, eczema, rashes, inflammations, irritations, and chafings, of infancy and childhood, permits rest and sleep to both parent and child, and points to a speedy cure, when other remedies fail. Worn-out and worried parents will find this pure, sweet and economical treatment realizes their highest expectations, and may be applied to the youngest infants as well as children of all ages. The Cuticura Remedies are sold by druggists everywhere. Send to Potter Drug & Chem. Corp., sole proprietors, Boston, Mass., for their free 32-page Cuticura Book on the care and treatment of skin and scalp of infants, children and adults.

Completely Pauperized.

Albert W. Hubbard, New York's charity expert, said at a recent dinner:

"The great danger of charity is its pauperizing effect. This effect must be avoided, or the recipients will all become Jack Hanches."

"Jack Hanch," on the score of bad health never worked, and the pastor of the Methodist church, a man whose heart sometimes outran his head, sent the idler and his family weekly gifts of food and clothing—supported the whole crew, in fact.

"A church visitor, after listening to Jack's complaints one day, said:

"Yes, of course, you have had bad health, we know that; but one thing at least you ought to be thankful for, and that is our pastor's kindness in sending you all this bread and meat and jelly and blankets and so on. Don't you think it is good of him to look after you so well?"

"Good of him?" said Jack, impatiently. "Why, what's he for?"

Fable of Pan of Biscuits.

A Vassar girl married a Kansas farmer.

Two weeks later a cyclone made the happy pair a friendly call.

It cavorted around the premises, ripping up the fences, scattering the haystacks and playing horse with the barn, but when it looked through the open window it drew back in alarm.

There lay the bride's first pan of biscuits.

"I ain't feelin' very strong this mornin'," murmured the cyclone.

And with another glance at the terrible pan it blew itself away.

WISE WORDS.

A Physician on Food.

A physician, of Portland, Oregon, has views about food. He says:

"I have always believed that the duty of the physician does not cease with treating the sick, but that we owe it to humanity to teach them how to protect their health, especially by hygienic and dietetic laws.

"With such a feeling as to my duty I take great pleasure in saying to the public that in my own experience and also from personal observation I have found no food equal to Grape-Nuts, and that I find there is almost no limit to the great benefits this food will bring when used in all cases of sickness and convalescence.

"It is my experience that no physical condition forbids the use of Grape-Nuts. To persons in health there is nothing so nourishing and acceptable to the stomach, especially at breakfast, to start the machinery of the human system on the day's work.

"In cases of indigestion I know that a complete breakfast can be made of Grape-Nuts and cream and I think it is not advisable to overload the stomach at the morning meal. I also know the great value of Grape-Nuts when the stomach is too weak to digest other food.

"This is written after an experience of more than 20 years, treating all manner of chronic and acute diseases, and the letter is written voluntarily on my part without any request for it."

Read the little book, "The Road to Wellville," in pkgs. "There's a Reason."

ESTIMATES GIVEN

R. F. D. No. 1 ANTIOCH, ILL.

AUCTION SALES

The undersigned, having rented his farm, will sell at public auction at the farm 3 1/2 miles northeast of Antioch and 1/2 mile west of Pikeville, on

WEDNESDAY, NOVEMBER 2, 1910, commencing at 10:00 o'clock sharp the following property to-wit: 32 cows new milkers and springers and heifers, 10 Holstein heifers 1 year old, 1 Holstein bull 2 1/2 years old, 1 Holstein bull 1 1/2 years old, 6 good work horses, 1 colt 2 years old, 1 colt 1 year old, 1 sucking colt, 1 Shetland pony 5 years old, 4 hogs 1 year old, 37 shoats, Champion grain binder, Deering corn binder nearly new, Deering mower nearly new, Bradley sulkey plow nearly new, 1 sod cutter new, 2 horse cultivator, 1 hay loader, 1 side delivery hay rake, 1 J. I. Case corn planter new, 1 16 in. Rose silo feed cutter and carrier, 1 feed grinder, 1 seeder, 1 drag, 2 walking plows, 1 Cyclone grass seeder 1 new Baker pump jack, 1 surrey, 1 narrow wheel wagon, springs and box 1 nearly new 4 in. truck wagon, 2 hay racks, 1 long sleigh, 4 stone boats, 1 hay stacking outfit, 1 hay fork and rope, 2 sets double harness, 1 farming mill, 1 400 lb scale, 1 hard coal stove, 4 milk cans, silo forks, pitch forks and shovels, post diggers, etc., 12 acre of corn in shock, 1000 bu. oats 900 bu. barley, 20 ton tame hay and some wild hay, about 30 bu. clover seed, 1 stack of oat straw, 1 stack of barley straw. Lunch at noon. Usual terms.

ED. FOX, Prop.
GEO. VOGEL, Auctioneer.

Having decided to rent my farm, I will sell at public auction on the farm 3 miles south of Bristol, 2 miles north of Pikeville, and 5 miles northeast of Antioch, on

SATURDAY, NOVEMBER 5, 1910, commencing at 11:00 o'clock sharp, the following property: 1 team heavy work horses, wt. 2600; bay horse, 7 years old, wt. 1100; sorrel mare, 8 years old, wt. 1200; black colt coming 3, wt. 1200; 15 head of cattle, 180 head of grade sheep, 30 head of Angora goats, 6 shoats, 40 tons alfalfa hay, 30 tons prairie hay, 10 acres corn in shock, Champion grain binder, Champion mower, Osborn corn binder, Osborn reaper, stubble plow, Gale riding plow, 2 steel beam walking plows, steel-harrow, corn harrow, Acam harrow, new; corn planter, grain seeder, Clover Leaf manure spreader, 2 sulky cultivators, Cream City farm truck and box, nearly new; wide wheel wagon with extra set of wheels, milk wagon, sod cutter, pony buggy and harness, feed cooker, 2 sets heavy work harness, light driving harness and other articles. Usual terms. Farm for rent.

CYRUS CURTIS, Prop.
GEORGE VOGEL, Auctioneer.

It's The World's Best.

No one has ever made a salve, ointment or balm to compare with Bucklen's Arnica Salve. It's the one perfect healer of cuts, corns, burns, bruises, sores, scalds, boils, ulcers, eczema, salt rheum, for sore eyes, chapped hands, or sprains. Infallible for piles: Only 25 cents at Swan's drug store.

ANOTHER WOMAN CURED

By Lydia E. Pinkham's Vegetable Compound

Black Duck, Minn.—"About a year ago I wrote you that I was sick and could not do any of my housework. My sickness was called Retroflexion. When I would sit down I felt as if I could not get up. I took Lydia E. Pinkham's Vegetable Compound and did just as you told me and now I am perfectly cured, and have a big baby boy."

Consider This Advice. No woman should submit to a surgical operation, which may mean death, until she has given Lydia E. Pinkham's Vegetable Compound, made exclusively from roots and herbs, a fair trial. This famous medicine for women has for thirty years proved to be the most valuable tonic and invigorator of the female organism. Women residing in almost every city and town in the United States bear willing testimony to the wonderful virtues of Lydia E. Pinkham's Vegetable Compound. It cures female ills, and creates radiant, buoyant female health. If you are ill, for your own sake as well as those you love, give it a trial.

Mrs. Anna Anderson, Box 10, Black Duck, Minn.

Mrs. Anna Anderson, Box 10, Black Duck, Minn.

Mrs. Pinkham, at Lynn, Mass., invites all sick women to write her for advice. Her advice is free, and always helpful.

EMPTY ADVICE.

Mike—Shure, OI feel very queer, Dan. OI have stich a feel av fullness after me meals. Do yez know a rimldy tur thot?
Dan—OI do, me boy. Whin yez sit down to ate a meal, don't ate any.
Mike—But thia OI shud be full av amptness!
The Most Noticeable Change. "So you have lived in Europe for 25 years? That's a long time for a man to be away from his own country."
"Yes, it is, and I'm mighty glad to be home again."
"I suppose you notice a great many changes?"
"Yes, many."
"What, if I may ask, is the greatest change that has come to your notice?"
"The greatest change, it seems to me, is to be found in the fact that the vice-president of the United States succeeds in getting his name in the papers nearly as often as he might if he were a baseball player or a promising lightweight prizefighter."

Now He Knows.

"On what grounds does your father object to me?" he asked.
"On any grounds within a mile of our house," she answered.

It seems as though women's styles change so often more to keep men's noses down to the grindstone.

A woman hates her enemies longer than she loves her friends.

When It's "What for Breakfast?"

Try **Post Toasties**

Serve with cream or milk and every member of the family will say "ripping" good. And don't be surprised if they want a second helping.

Postum Cereal Company, Ltd., Battle Creek, Mich.

WASHINGTON GOSSIP

Cruise of World for Naval Cadets

WASHINGTON.—The fighting ships are going on another cruise, partly to the sake of the cruise and partly to advertise the navy and attract young men to it. Sixteen of the battleships will turn their prows away from the home land and steam off into the Atlantic, bound on a tour of the European ports.

For months the publicity experts of the navy department have been exploiting the voyage for the purpose of getting young men to recruit. Not all of them will be chosen to go, but they all have an equal chance and those who do not go this time will go the next time, for it is the purpose to have these cruises every year to make the services more attractive to young Americans and cause them to enlist in such numbers as are required for the proper manning of the fighting ships.

When this cruise was first announced, several months ago, the navy department issued advertising matter to draw recruits. One of its most effective documents was a circular letter, prepared at Washington, but sent out from the various recruiting stations. It was written in a heart-to-

heart style. The cruise meant, according to the letter-writer, "that thousands of young Americans will have a chance to see the world and get paid for it. Do people who save for months or years to go abroad ever regret it? I want to ask you this important question: Are you willing to travel if you are well paid for it, or would you rather stay at home and read about it?"

Naturally, when it is put up to him in that fetching fashion, the young man concludes that he would a good deal rather travel and get paid for it, and he hits to the nearest recruiting station and enlists. Long cruises cost a lot of money, but they bring in young men and the navy must have young men even if they do come high.

Another heart-to-heart letter is addressed to the young man who is tired of his job. "Perhaps you are unhappy in your present job," writes the recruiting officer. "Perhaps it doesn't pay you enough. Perhaps there is no future to it. Perhaps your present work will never satisfy your burning ambition to win great success. Well, now if you want to change your job, I'd like to have a talk with you and tell you all about a bluejacket's life in the navy."

If the young man isn't tired of his job that letter is calculated to make him tired of it, and the navy gets another man. Other appeals are made, but the cruise talks are what bring the best results.

Put Under Bonds to Keep the Peace

MEXICO is a striking illustration of the way modern business puts nations under bonds to keep the peace. A naturally turbulent Latin-American republic, mainly Indian in blood, pays coupons on its government bonds to citizens of 21 nations. That is the number of countries represented last year. In 1907, coupons on Mexican government bonds were redeemed for citizens of 16 nations.

Every country so interested, through its citizens, in the stability and honesty of the Mexican republic, is an influence on the side of peace and order in Mexico. In a very real sense the Mexican nation has given bonds to keep the peace by selling government securities to foreigners living under many flags.

Less directly, but still in ways that count heavily the sales of private property to foreign investors are also equivalent to giving bonds to keep the peace. In the last quarter of a century American capital to the amount of not less than \$1,000,000,000, according to excellent authorities, has been invested in Mexican mines, planta-

tions, railroads and other Mexican property. European money has poured into Mexico in a similar stream. Of course, no Mexican government ever guaranteed the security or the profitability of such investments. No government of any great power would undertake to collect from the Mexican people, as a nation, money to make good the losses sustained by Americans making unwise investments in Mexico. It is not a question of such compulsion.

But every power which has many subjects who have staked money upon the stability of the Mexican republic, the justice and solidity of the Mexican government, and the general sanity and regard for business obligations of the Mexican nation, will exert more or less pressure upon Mexico if that country should ever default as a nation or encourage its citizens to refuse to pay their just debts. In the aggregate these forces brought to bear upon Mexico can be trusted to have a deep and wide influence there.

Such international business bonds of peace are constantly becoming more important in many parts of the world. Every year the financial and commercial ties which knit the nations together increase in strength. Always the tendency of the times is toward the creation of closer international relations and a surer sense of common interest in the preservation of peace.

Bank Failures Due to Lax Examiners

CLOBBED upon the heels of the radical shake-up in the ranks of the United States bank examiners, by which 20 men were shifted to new folds, Controller of Currency Murray announces that he will make a personal investigation of conditions in all examination districts. In deciding upon this course of action the controller says:

"In almost every case of a national bank failure since I have been controller the insolvency could have been averted had the national bank examiner determined the true condition and reported his findings in time for me to force a correction in the administration of the bank's affairs."

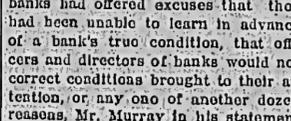

After citing that examiners of failed banks had offered excuses that they had been unable to learn in advance of a bank's true condition, that officers and directors of banks would not correct conditions brought to their attention, or any one of another dozen reasons, Mr. Murray in his statement says:

"Many of the examiners state in their reports of examinations, forwarded to the controller's office, that it is a hardship not only on the examiner but upon many of the members of the directory of country banks, to ask the various boards to meet with the examiner during the progress or at the close of the examination."

"This investigation by the controller and his chief of the division of reports is also an investigation into the methods employed by every national bank examiner, and upon seeing them make an examination of several banks and afterward holding a meeting of the directors, he will be able to determine who of his examining force, if any, are inefficient."

The work of so modifying the paper currency would require 18 months, so that no sudden appearance of the smaller notes can be expected. White engravers and printers might be busy, the scheme would pass into an old story.

Want to Shorten 'Long Green' Notes

plates and that would be much greater than the renewal of such as wear out. On the other hand the experts reckon that a saving of \$612,000 a year may be made by the reduction in size. The secretary will ask congress to conform the bank bills to the new dimensions at government charge for new plates.

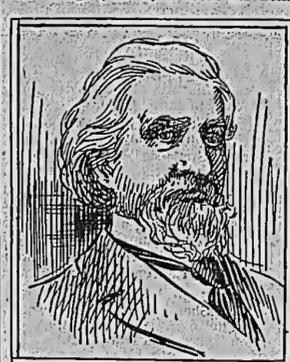

The department hesitates to go forward in the matter without public approval and invites criticism and suggestion. The clipping-off of more than half an inch in width and 1.28 inch in length saves so much in paper and permits five notes instead of four to be printed on a sheet. The guess how much longer the smaller note will last than the present paper can be verified only by trial.

AUTHOR OF "DARIUS GREEN"

John Townsend Trowbridge Wrote the Poem 40 Years Ago, and the Whole Country Laughed.

Boston.—Among the thousands of persons who witnessed the recent aviation meet at Boston there was no more interesting spectator than John Townsend Trowbridge, author of the poem, "Darius Green and his Flying Machine," which made the whole country laugh 40 years ago.

Despite his advanced age, 83, Mr. Trowbridge journeyed from his home

John Townsend Trowbridge.

In Arlington, Mass., to this city in order to take his first look at a machine which had been his dream from boyhood—a machine which would fly. He was introduced to several of the aviators, among them Glen Curtiss, Grahame White, Wilbur White and others, and the old gentleman was immensely pleased to meet them.

When Mr. Trowbridge wrote about Darius Green, 40 years ago, no one of that time expected to see a flying machine that would fly. There were lots of machines that wouldn't, but the idea of surpassing the realm of the birds carried something uncanny with it. The haphazard results of experiments of those times were always looked upon, more or less, as deserved.

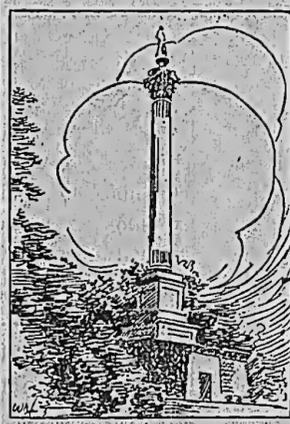

Speaking of the days of Darius Green, the poet says: "I never dreamed when I wrote that poem that such a thing as a flying machine was possible in my time. I never had the thought of actually seeing one. While I have never attempted to build one, I have followed the aeroplane development from the first, and it has always seemed to me that the greatest factor and the hardest to overcome would be the motive force."

"I have never known that there were such powerful motors, and motors so light, as they are now using. They were a revelation to me. I don't care to make any prophecies as to the future, but it seems to me that the large machine for carrying passengers is possible, and only a matter of time."

TWICE STRUCK BY LIGHTNING

Beautiful Memorial to Henry Clay at Lexington, Ky., Shattered by Electric Bolts.

Lexington, Ky.—It is a singular coincidence that lightning twice in succession has destroyed the statue erected in the cemetery here to the memory of Henry Clay. Years ago the people of Kentucky, proud of the greatness of Henry Clay and his dis-

Monument to Henry Clay.

tinguished public services, erected a handsome memorial to him in the cemetery where his ashes repose. In 1903 lightning shattered the statue crowning this memorial and steps were soon taken to repair the statue. A new one was placed in position the past summer. Before it could be dedicated lightning again destroyed it.

This elemental action seems typical of the life of Clay himself. He was one of the commanding figures of his time, distinguished as a statesman, orator and diplomat and greatly admired by millions of Americans. His one great ambition was to be president of the United States, but his prospects, even when most promising, were always shattered, just like the statue on the top of the imposing shaft, which a grateful state has erected in his memory.

A Funeral In Japan.

Tokyo, Japan.—In Japan a funeral procession is supposed never to go out of the front gate of a house, the back gate being generally used, and if there is no back gate an arch or ring of bamboo is held by two men within the front gate and the bier passes through that. After a funeral it is sprinkled on the threshold and the house is swept out.

NOTHING BETTER IN SIGHT.

George Davis A.

Cook—Please, ma'am, I want to give a week's notice.

Mistress—Why, Jane, this is indeed a surprise. Are you not satisfied with the treatment you receive here?

Cook—Oh! yes, ma'am.

Mistress—Then I suppose you have something better in view?

Cook—Oh! no, ma'am; I'm only going to get married.

Wrong Guess.

It was exhibition day at No. 3, and as the parents of Jack Grady, the dullest pupil, were listening hopefully, the teacher tried her best to help the boy. "How did Charles I. of England die?" she asked, assigning the easiest question on her list to Jack. As he looked at her, with no indication of a coming answer, the teacher put her hand up to her neck. Jack saw the movement and understood its meaning, as he thought, "Charles I. of England died of cholera," he announced briskly.—Youth's Companion.

Resinol Quickly Cures Itis and Accidents the Skin Is Subject To.

Also Heals Wounds.

I find occasion almost daily to recommend Resinol to some of my friends, and hear of most gratifying results. We use the ointment altogether in my family, and are never without a jar of it, for it promptly cures the itis and accidents the skin is subject to. D. M. Castle, Philadelphia, Pa.

A man can't understand why a woman who never spends more than 17 cents for her luncheon should think nothing of blowing in \$50 for a hat.

Dr. Pierce's Favorite Prescription

BOYS' SHOES, \$2.00, \$2.50 & \$3.00. BEST IN THE WORLD.

W. L. Douglas \$3.00, \$3.50 and \$4.00 shoes are positively the best made and most popular shoes for the price in America, and are the most economical shoes for you to buy.

Do you realize that my shoes have been the standard for over 30 years, that I make and sell more \$3.00, \$3.50 and \$4.00 shoes than any other manufacturer in the U.S., and that DOUGLAS SHOES FOR THE PEOPLE are the shoes to hold their shape, look and fit better, and wear longer than any other \$3.00, \$3.50 or \$4.00 shoes you can buy? Quality counts. It has made my shoes THE LEADERS OF THE WORLD.

You will be pleased when you buy my shoes because of the fit and appearance, and when it comes time for you to purchase another pair, you will be sure to purchase my shoes because the last ones wore so well, and gave you an excellent comfort.

CAUTION! None genuine without W. L. Douglas name and price stamped on the bottom. TAKE NO SUBSTITUTE.

If your dealer cannot supply you with W. L. Douglas Shoes, write for Mail Order Catalog.

Fine Pianos at Moderate Prices

The words above fairly describe our Kingsbury pianos.

These instruments have made their reputation on the actual service they have given to thousands of buyers.

There is hardly a community in the United States where you cannot find Kingsbury pianos in daily use, giving the most complete satisfaction to their owners.

Three different styles in various woods and finishes enable you to choose to advantage an instrument that will please you.

You can see the Kingsbury and get information about prices at

Wm. Keulman's Jewelry Store

If you want to make sure of getting a piano which will give you years of service and not cost you a large sum of money, you will serve your interests well by choosing a Kingsbury.

PIANOS TO RENT—If you are not quite ready to buy, you can rent a good instrument from us. If you purchase within a year, what you have paid in rental will be applied on the price.

Expert Tuning—If you now have a piano let our expert tuner and regulator look it over. He is in town nearly every month. Leave your order at the address above.

SENSATIONAL SALE OF READY-TO-WEAR

A Manufacturers Surplus Stock of Suits, Coats, Dresses, etc., was Purchased at Close to Half Price and is offered at Equal Saving

ONE of the biggest New York Garment Makers over estimated the volume of business he would do. He didn't plan on the long spell of warm weather we have been having, for had it been colder and more reasonable he would have easily disposed of the entire production, as his garments are much in demand by all first class retailers. He decided, however, that he might as well take his loss first as last so he offered his entire surplus stock at close to one-half the regular prices. Now that the weather has changed and you require warmer apparel you'll find this sale the opportune event at which to supply your cold weather needs at record breaking prices.

The Big Coat Bargain of the Season—Special at 8.95

You couldn't begin to buy the material and linings for the price we are asking for these coats; it's only through the terms of our purchase that we can offer them to you at such saving. They are stunningly tailored of all wool broadcloth and attractive novelties; some plaid tailored effects, others more extreme in style. The tailoring is of an exceptionally high class nature and they are lined throughout with a splendid quality of satin; \$15 values at
